February 2022

TO THE PARENTS OF GRADE 4 STUDENTS

Subject: Vaccination program in schools

Dear parents,

Quebec's immunisation schedule plans that children in 4th grade receive certain vaccines in a school setting. Hepatitis A and B and human papillomavirus vaccine will be available free of charge. Considering vaccination against COVID-19 in the 5-11 year old group, rest assured that the prescribed times between vaccines will be evaluated and respected by the nurses according to the standards of the Quebec immunization protocol. It is therefore recommended and safe that your child receive the planned vaccines in the regular schedule.

Authorization form

You will find enclosed a brochure containing a vaccination authorization form against Hepatitis A, Hepatitis B and HPV.

The consent form must be download, completed, signed and returned by e-mail at 07.infirmieresscolaires@ssss.gouv.qc.ca by tomorrow. All sections must be completed even if you refuse or if your child has previously received the vaccines. It will be impossible to vaccinate your child at school if the consent form is not properly completed or if the necessary information is missing for the evaluation of his/her vaccination status. If you wish to withdraw your consent, you need to speak directly WITH the school nurse.

Vaccination Day

- Have your child wear a shirt with short sleeves;
- Your child must bring with him/her their vaccination booklet;
- If your child is sick or absent from school, on the day of our visit the school nurse will send you a letter to explain what to do.

Should you wish to have additional information, you may contact the school nurse or consult the Website: <https://www.quebec.ca/en/health/advice-and-prevention/vaccination/school-based-vaccination>.

Here is the vaccination date as well as the contact information of the nurse responsible for your school.

Nurse / Contact information : Name : Cindy Carpentier Phone number : 819-213-8528 E-mail : Cindy_Carpentier@ssss.gouv.qc.ca	Vaccination date : April 29, 2022
